Fayis Kanthapuram

FULL STACK DEVELOPER

Kerala, India | fayiskanthapuram@gmail.com
github.com/FayisKanthapuram | linkedin.com/in/fayis-kanthapuram | fayis-kanthapuram.vercel.app

Professional Summary

Full-stack developer who builds end-to-end web applications with React, TypeScript, Node.js, and modern backend frameworks. Experienced in designing REST APIs, authentication and role-based access, database-backed workflows, payment integration, and responsive user interfaces. Focused on practical software with clear data models and reliable application logic.

Technical Skills

Languages: JavaScript, TypeScript, HTML, CSS
Frontend: React, Next.js, Vite, EJS, Tailwind CSS
Backend: Node.js, Express, NestJS, REST APIs, JWT, session authentication, Google OAuth
Databases and tools: MongoDB, Mongoose, PostgreSQL, Prisma, Git, GitHub, Vercel, Razorpay

Selected Project Experience

Mobiverse | *Node.js, Express, MongoDB, EJS, Razorpay*

- Built a server-rendered mobile commerce application with product discovery, search and filtering, product variants, account sign-in, cart, coupons, checkout, and administration.
- Implemented session authentication and Google OAuth; organized backend request handling across controllers, services, and repositories.
- Added server-side Razorpay signature verification and MongoDB transactions to finalize orders and update stock together.

Diamond Pappadam | *React, Vite, Express, MongoDB, JWT*

- Developed production and payroll software with separate employee and administrator workflows for production entry, approval, reporting, and salary tracking.
- Implemented role and ownership checks, stored production rates, and a salary ledger that distinguishes approved earnings from recorded payments.

DailyOS | *React, TypeScript, NestJS, Prisma, PostgreSQL*

- Built a task and recurring-habit planner with calendar views, progress statistics, and daily, weekly, and monthly schedules.
- Modeled recurring templates and schedule history to preserve completed activity when schedules change; implemented timezone-aware date handling and account ownership checks.
